SUMMARY

Motivated and adaptable Bachelor of Science in Information Systems student with practical experience in ICT support, digital communication, and information systems applications. Skilled in content management, basic web technologies, graphic design, and digital reporting through university projects and organizational involvement. Seeking an industrial attachment opportunity to apply academic knowledge, gain structured practical training, and develop professional competence in a real-world organizational environment.

OBJECTIVE

To apply my academic training in Information Systems within a software- and technology-driven environment, contributing to ICT operations, software applications, and digital communications systems while developing practical skills, professional competence, and real-world experience in system development, data management, and technical support.
